

Calvin Kent Pamandanan

Junior Web Developer

Central Luzon, Philippines | p.calvinkent@gmail.com | linkedin.com/in/clvnknt | github.com/clvnknt

SUMMARY

Junior web developer with nearly two years of experience building and maintaining a real-time client dashboard, plus Laravel and Angular projects from database schema to UI. Strong in SQL performance tuning, release coordination, and technical writing. Acting as project manager on the team since May 2026, alongside hands-on development.

SKILLS

Front end: Angular, React, Next.js, TypeScript, Tailwind CSS, Bootstrap, Low-code dashboards, Figma
Back end and data: Laravel, PHP, MySQL, PostgreSQL, TimescaleDB, query performance tuning
Tools and delivery: Git, GitLab, Docker Compose, Linux, release management, test automation
Project and collaboration: Jira, ClickUp, Slack, Microsoft Teams
AI-assisted work: AI-assisted development, Claude Code, prompt writing
Working style: Debugging and root-cause analysis, technical writing, sprint planning, stakeholder communication

WORK EXPERIENCE

- Junior Web Developer, Boomerang Inc** Nov 2024 - Present
 - Build and fix features for a real-time, data-heavy client dashboard on a low-code platform: UI, SQL, and performance tuning.
 - Profiled slow pages, added indexes, and wrote the root-cause analysis behind a team fix that roughly halved app load time.
 - Owned a user-settings copy and restore feature end to end: technical design, backups, rollback script, and user guide.
 - Coordinate releases (release candidates, staging rehearsals, approvals, deployment plans) and write functional specs, technical designs, and impact analyses.
 - Acting as project manager since May 2026 (about half my time): sprint planning, workload, and daily and weekly client reporting. Moved team tracking to ClickUp.
- Software Engineer Intern, Cloudstaff** Feb 2024 - May 2024
 - Built a shift scheduling and time-tracking app in Laravel: clock in/out, shift records, and timesheets.
 - Automated hours, tardiness, and overtime calculations with scheduled jobs and UTC timezone handling.
 - Started the Angular admin app and the API behind it.

PROJECTS

- Portfolio** 2026
Statically exported site with Next.js 16, React 19, TypeScript, and Tailwind CSS 4. Content driven by typed data files, with unit tests in Vitest.
- ShiftSync** In progress
Employee shift scheduling and time tracking with Laravel 10, Sanctum, and Angular 16. Scheduled jobs compute hours rendered, tardiness, and overtime; per-employee timezones with UTC storage.
- CritterCare** Thesis project, Angeles University Foundation (2023-2024)
Animal shelter management system in Laravel 10 and MySQL. Three roles enforced by route middleware, an adoption approval flow with pet monitoring, and PDF exports.

EDUCATION

- Bachelor's degree, Information Technology, Angeles University Foundation** Aug 2020 - Jul 2024

CERTIFICATIONS

- Information Technology Specialist in Cybersecurity**, Certiport 2023
- Cybersecurity Essentials**, Cisco Networking Academy 2023
- Introduction to Cybersecurity**, Cisco Networking Academy 2022
- Database Programming with PL/SQL**, Oracle Academy 2022
- Database Foundations**, Oracle Academy 2022
- CCNA: Routing and Switching Essentials**, Cisco Networking Academy 2021
